Fast Friends Hydrotherapy

IN PARTNERSHIP WITH
CANINE COMEBACK REHABILITATION

Pictured is Karen MacIntyre working with patients. Heated Hydrotherapy utilizes the properties of water — buoyancy, resistance and hydrostatic pressure for pain free therapy.

The Benefits of a Water Treadmill

Heated Hydrotherapy has many benefits for your dog —

- improved strength
- muscle endurance
- increased range of motion (ROM)
- cardiorespiratory endurance
- decreased stress on healing tissues

The specific type of aquatic therapy used for you dog will depend on the rehabilitation or conditioning needs for each individual.

We will work with you and your veterinarian to establish a rehabilitation program that is best suited to your dog and their return to optimum health.

CONDITIONING FOR PETS AND WORKING DOGS

Heated Hydrotherapy prevents injury and promotes health — both need to be maintained in good physical condition year round which is sometimes challenging to achieve in our New England climate.

KAREN MACINTYRE

Owner and operator of Canine Comeback since 2010, Karen has joined Fast Friends to offer rehabilitation services to dogs that are returning to health from either surgery or an injury as well as conditioning services from weight loss to competition and service dogs.

Karen has 30 plus years of breeding German Shepherds. She is a USCA Licensed Judge for Conformation and Performance, President and Training Officer of Canine Alert Search Teams (member of the International Rescue Dog Organization).

Through her own dogs and working with SAR and police dogs Karen developed a passion for working with canine injuries, rehabilitation and conditioning to aid in keeping these dogs with demanding jobs in top working efficiency as well returning pets to an active lifestyle
